Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a bone clip for cooking bone connected to meat, classified in class 294, subclass 9.
- II. Claim 7, drawn to a method for cooking a rack of lamb utilizing a bone clip having jaws for gripping and heat protection, classified in class 426, subclass 523.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of Group II as claimed can be practiced without the specifics of the Group I apparatus such as a first clip member pivotally attached to a second clip member by a pivot pin, the first clip member and second clip member defining widening jaw portions, the centrally disposed pivot portions and handle portions, wing sections connected to the centrally disposed pivot portions, the wing sections also having apertures for receiving the pivot pin disposed within a coiled hollow body portion of a torsion spring, the spring also having elongated leg portions, the leg portions being placed in compression by movements against the centrally disposed pivot portions of the clip members and the widened jaws being movable between a closed gripping

position in contact with each other and an open nongripping position not in contact with each other, etc.

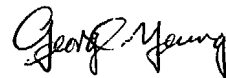

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)

Any inquiry concerning this communication should be directed to Examiner George C. Yeung at telephone number (571) 272-1412 and the fax phone number for the organization where this application is assigned is (703) 872-9306.
